

## **MAKE IT YOUR BUSINESS TO FIGHT COVID-19 AND THE FLU!**

The 2021-2022 flu season is quickly approaching and, as we are all aware, we are still battling COVID-19. The best way to prevent employee illness is by providing flu and COVID-19 vaccinations. Sanford Health Occupational Medicine Clinic offers a convenient way to keep your employees healthy and free from either of these illnesses - schedule a worksite COVID-19/Flu Shot Clinic.

By offering the vaccines to employees at the workplace, you reduce the many barriers that can prevent a worker from getting vaccinated, and ultimately may reduce the number of sick days taken by employees.

The Centers for Disease Control is recommending that persons be vaccinated for these illnesses as soon as possible.

**For more information or to schedule a date for your worksite vaccination clinic, call 1-888-600-2378.**
